

Some pharmacies (Walmart specifically) are requiring a diagnosis to be associated with narcotic scripts. To save a phone call from a pharmacist - please start associating a diagnosis when you order a narcotic/benzo.

There is an "associate diagnosis" tab. Any diagnosis you have already put in under impression will show up as an option, or you can just type one (which will also in turn be added to the impression tab).

HYDROcodone-acetaminophen (NORCO) 5-325 mg per tablet
